1. Objectives

The primary goal of this course is to provide students with a basic understanding of white-collar, corporate, and Government crime. The student will learn to utilize a sociological perspective in understanding those problems. We will examine a variety of issues including crimes against consumers, environmental crime, institutional corruption, various types of fraud, computer crime, and crimes by the government and public officials. While some of these issues do not appear to affect us directly in our day-to-day lives, they do have an overall effect on our social world.

By approaching these topics from a sociological perspective, the student will learn to think critically and creatively about why these problems persist in our society and what could be done to manage or solve them.

2. Grading Procedures

The final course grade will be determined by your performance on 2 equally weighted objective type exams, electronic discussion boards, and a semester paper on a topic of the
