Course Description. This course examines how cities and city life are shaped by social, cultural, political, and economic forces operating at many different levels. It also deals with how diverse groups of citizens in particular urban places relate to changes in their cities. Finally, the course also explores how different urban environments, such as different neighborhoods, influence the lives of city residents. Topics covered include the emergence of cities in different historical periods, spatial aspects of urban growth, urban power and politics, social diversity and inequality, and various issues currently confronting cities, such as residential segregation by race and class, deindustrialization, concentrated poverty, affordable housing, homelessness, sprawl, gentrification and urban renewal/displacement, and urbanization in low-income countries of the world.

Objectives. Students will become familiar with basic information on the sociology of cities, and the course will provide the conceptual and theoretical tools to understand and analyze major social issues facing cities today. They will also learn to apply general principles of urban sociology to specific cities, and they will be able to critically evaluate urban social policies. They will learn to apply social science theories and knowledge about urban/community issues to specific aspects of urban/community change, to locate social science scholarship on such issues, to synthesize different sources of such scholarship, and to communicate as both a social scientist and an educated member of the public. Group discussions, expert guest speakers, in-class exercises, individual presentations and traditional lectures will be used to achieve these learning objectives. The course will culminate with students making presentations to the class on some important urban issue which they have researched and developed a position or policy paper.

Evaluation. Students will be evaluated on the basis of three examinations, the written research project and presentation, any special assignments that might be made (e.g., group work, etc.), and class participation. The examinations and paper each count for 20% of the final grade, class participation, including paper-based presentations and other possible special assignments will count for an additional 20% of your grade. (Thus the paper and presentation together count for about 35% of the final grade.) No extra credit work is available. Reading should be completed by the time of class on the day that it has been assigned. Most of the information in class will deal with general principles of urban sociology, and most of the reading assignments cover specific examples of urban social structures and processes. Exams will cover both. Since the material presented in class does not duplicate the content of the reading, it is important that students both complete all the reading and attend class. Exams will require students to integrate diverse materials from class and reading in answering general questions, and it is extremely doubtful that satisfactory examination scores can be obtained without good understanding of both.

WebCT: The syllabus, assignments, announcements, etc. will be posted to WebCT. Students are advised to check WebCT frequently for any changes or announcements pertinent to this class. Additionally, newspaper articles, journal articles or other media corresponding to course material will be periodically posted to WebCT. Though not specifically assigned in the reading assignment list
below, students will find useful and relevant information in these articles and are encouraged to read them. Class Links on WebCT will provide useful information when writing your short paper and preparing your class presentations.

**Online Resources:** The *online exercises* at the conclusion of each chapter have been expanded by the inclusion of websites for further research and Info Trac College Edition search terms. *Cities, Change and Conflict* has a website. It can be reached through [http://sociology.wadsworth.com](http://sociology.wadsworth.com). Though the online exercises at the end of each chapter are not required, the exercises are a useful compliment to the textbook.

**Accommodations for Disabled Students.** If you have any condition, such as a physical or learning disability, which will make it difficult for you to carry out the work as I have outlined it or which will require academic accommodations, please notify me in the first two weeks of the course. To do so, you may make an appointment to speak with me in my office, or come by during office hours. Written documentation of the disability should be submitted along with the request for special accommodation. Contact the Center for Disabled Student Services (160 Union, 581-5020) to facilitate requests.

**Academic Honesty.** It is assumed that the work you submit to me is your own work, and when you have used the ideas of others you have properly indicated that you have done so. Plagiarism and cheating are serious offenses and may be punished by failure on the exam, paper or project; failure in the course; and/or expulsion from the university.

**Research Paper and Presentation.** A research paper dealing with some aspect of *urban sociology* is required. One objective of the paper assignment is to acquaint students with social science journals and social science research, and another key objective of the paper is to use it as a basis for making a public presentation of an academic and/or public policy nature. The paper will be accomplished in several steps.

- **First**, a topic must be chosen and submitted for approval. Possible topics include those listed below as class topics, those covered in the reading, or others that seem to have relevance to cities and city life. The topic is to be turned in in writing on September 18.

- **Second**, once approved, you will locate eight journal articles that deal with this topic, and you need to submit a list of them (cited in the style of the *American Sociological Review*) on October 18 (see list of suggested journals, below).

- **Third**, an annotated bibliography is to be submitted by October 30. This involves short summaries of each article in addition to the simple citation. The short summaries should not quote or paraphrase the abstract for the article. Instead they should include (a) a short description of the author's objectives (e.g., what was the major question(s) the author was trying to illuminate?), (b) a brief discussion of the general theoretical approach; (c) a description of the nature of the data on which the conclusions were based and how the data were collected. Was it a survey, experiment, qualitative case study, theoretical or polemical treatment, or what? (d) a short summary of what the author(s) found and/or concluded. Each summary should be preceded by the full reference, being careful to properly format the reference and have it in alphabetical order by author’s last name.

- **Fourth**, the first draft of the short paper is due on November 15th. In this paper, the topic is to be discussed using the eight references in an integrated way to inform this discussion. The paper should include an introduction of the topic, a discussion of the research you have found including its principal findings and controversies, and a conclusion--and a bibliography. The paper may be either one based only on a review of the research literature on a topic or it may include, in addition, data that you find
and bring to bear on the topic. Below are some websites and journals that you might find useful in developing your paper.

Fifth and finally, once the "redlined" copy of the draft is returned to you, you will begin revising it accordingly, with the final draft due on December 6.

Presentations: Beginning on November 26 you should be prepared to make a short, in-class presentation on your research paper. These will be rather short: ten minutes or so, depending on the number of students in the class. The presentation should describe the theme of the research paper and highlight what you found out about the topic. You should have a one-page (300 word) written essay on which to base your presentations. Of course you are encouraged to embellish your presentation with Powerpoint, overheads, hand-outs, and other such enhancements. We will discuss the elements of good presentations on October 23.

Required Books.

Topic and Reading Schedule
Lectures will not necessarily correspond with reading assignments – class attendance is important.

3
Week 5  **Film: Price of Renewal**  
**Short Paper Topic Submitted -- Due Today**

Writing the Research Paper II: Policy vs. Theory Relevance

Week 6  Cities in Europe

Suburbanization, Political Fragmentation  K1, Ch. 6

Week 7  **Take Home Exam I**  
Guest Speaker- Bob Farrington – Downtown Alliance

Cities in the Third World  K1, Ch. 7
Cities and Urbanization in Low Income Countries
Take Home Exam Due Beginning of Class

Week 8  Globalization and Cities  K2, Ch. 6, 7

Immigrants in the City: Immigration and Cities  K1, Ch. 8

Week 9  Race/Ethnicity, Class, & Gender in Cities  K1, Ch. 9, 10
Residential Segregation - Gentrification, Suburbanization
Community, Ethnicity, New Urban Reality  K2, Ch. 8, 9, 11
Sweatshops, Homelessness

**List of 8 References Submitted Today**

Week 11  Elements of an Effective Oral Research Presentation I: Knowing Your Audience  
Urban Economy  K1, Ch. 12
City Governments  K1, Ch. 13
Speaker: Alison McFarlane – Mayor’s Office of Economic Development

Week 12  Urban Economic Development  K2, Ch.14, 15  
Speaker: Maria Garciaz, Daniel Pacheco - Neighborhood Housing Services

**Annotated 8-Reference Bibliography Submitted Today**

Take Home Exam II

Week 13  Federal Urban Policy and Planning – Future Planning  K1, Ch. 14, 16
Take Home Exam II Due Beginning of Class

Urban Policy and Planning – Meeting with another class
Speaker – Stephen Goldsmith

Week 14
Heat Wave

Week 15
Heat Wave
Speaker: Ralph Becker, State Representative, Urban Planner
First Draft of the Paper Due

Heat Wave
Mike Stevers: Emergency and Disaster Planning Speaker

Week 16
Presentations (Presentations will be individual or group, depending on class size)

Presentations

**Final Draft of Paper Due Today**
Take Home Exam III Distributed

Final Exam
Exam III Due
